2. Current Activities

2.1 Operations Section

2.1.1 Narrative

Following the excavation, containerization, and staging of 44, 55 gallon drums containing illegally dumped waste and the associated impacted soil, EPA mobilized an ERRS crew to the site to characterize and properly dispose of the waste.

2.1.2 Response Actions to Date

In September, 2010 EPA tasked ERRS contractors to characterize, inventory, and sample the contents of 44 drums for disposal purposes. Of the 44 drums, 20 were determined to contain hazardous waste (~ 8,000 pounds), 18 contained non-regulated material (~ 7,800 pounds including PPE), 4 contained paint or paint waste related material.

The purpose of this initial mobilization was to inventory, characterize and sample the contents of forty four drums for disposal purposes. The drums, which contained flammable solid and liquid waste that had been collected by CSXT contractor, Geosyntec, had been sealed and staged following the an illegal dumping incident that occurred in a wooded area on the Site. Following sampling activities, the drums were re-sealed and secured. Analytical results are expected by next week. Following the selection of an approved disposal facility, ERRS will again mobilize to the site to conduct transport and disposal operations.

2.1.3 Enforcement Activities, Identity of Potentially Responsible Parties (PRPs)

EPA enforcement and cost recovery activities are on going.
